Subject: Letter of Recommendation for Orrin "Skip" Wobig Jr.

To Whom it May Concern:

I have known Skip Wobig since 1975. We were co-workers at Broyles and Broyles, Inc., Trinity Contractors, Inc. and Encompass Industrial/Mechanical of Texas. The companies were large Mechanical and Industrial Prime Contractors performing Plan and Spec and Design/Construct projects with HVAC and process piping, sheet metal, plumbing, insulation, millwright, automatic controls, electrical and civil scope of work.

This past ten years I worked closely with Skip on multiple Industrial and Industrial Prime projects such as: Central Utility Plants, the General Motors truck line conversion project, Temple Recon Cement Fiberboard plant and the GNB Battery Sodium Sulphate project.

My position was Vice President and chief engineer for Trinity Contractors and Encompass. The engineering department worked closely with the estimators in preparing the bids for Design/Construct projects as well as providing technical support for Plan and Spec projects.

Bob Stodghill was the Vice President of the estimating department. Bob always gave Skip the toughest projects with minimal information. (E.g.: Scope of Work, flow diagrams and minimum drawings). Skip's technical understanding of equipment and systems and expertise in design and construction enables him to fill in the gaps in preparing a complete and accurate estimate.

I strongly recommend Skip for an estimating position within your organization.

Sincerely,

James W. Hall, P.E.
