October 8, 2003

Subject: Skip Wobig

To Whom It May Concern:

If you are considering hiring an estimator, Skip is the one we would recommend. We have worked with him over the past 25 years and find him to be one of the most methodical, detail oriented estimators, with whom we have ever worked.

Unlike many estimators, Skip, is very knowledgeable of how a take off needs to be completed to assist the project manager in buying out a project. His attention to detail assures a company of material & services quotations that are representative of the requirements of the project at hand.

We have always found Skip to be trustworthy, decisive and a self starter, attributes that add value to his services. We have been honored to have worked with Skip over these many years.

Sincerely,
Mason-Dallas, Inc.

Phil Farco, Sr.
President
